Longitudinal Surveys of Australian Youth

Longitudinal Surveys of Australian Youth is a program of surveys of young people jointly managed by ACER and the Australian Government Department of Education, Science and Training (DEST). The surveys focus on the education and labour market experiences of groups of young Australians, beginning from their middle years of secondary schooling. Data collected include basic demographic variables, as well as information about educational and labour force participation and experiences extending over a number of years.

The present form of the LSAY program commenced in 1995 with a national sample of Year 9 students. The program also brings together earlier longitudinal studies conducted by ACER under the Youth in Transition (YIT) program, and by the Commonwealth under the Australian Longitudinal Survey (ALS) and Australian Youth Survey (AYS) programs. The data collected through LSAY are deposited with the Australian Social Science Data Archive (ASSDA) for use by other researchers.

The 1995 Year 9 Cohort (Y95)

In 1995, a nationally representative sample of approximately 13,000 Year 9 students was selected to form the first cohort of the new Longitudinal Surveys of Australian Youth program. The sample was constructed by randomly selecting two Year 9 classes from a national sample of 300 schools designed to represent state and sector. Reading and numeracy tests were administered to students in their schools to provide information on school achievement for use in later analyses of educational and labour market participation. Students also completed a background questionnaire about their educational and vocational plans and attitudes to school. In 1996, these students provided information in response to a mailed questionnaire. Information was also obtained from their schools about curricula and organisation.

In 1997, members of the sample were contacted in the first of the annual telephone interviews (conducted by AC Nielsen, then Reark Research). That questionnaire included questions on school; transitions from school; post school education and training; work; job history; job search history; non-labour force activities; health, living arrangements and finance; and general attitudes. Subsequent surveys (now conducted by the Wallis Consulting Group) have asked similar questions but with the emphasis changing over time from school, to post-school education and training, and to work.

Details on the 1995 survey are provided in LSAY Technical Report No. 9 (not publicly distributed). Details of the subsequent telephone surveys are covered by Technical Reports Nos. 11, 17, 18, 21, 25, 27, 28, 31, 33 and 36.

The 2005 Y95 Telephone Survey

The 2006 Y95 Telephone Survey was conducted with 3914 of the 4233 participants who formed the 2005 sample. Of the active sample, 3914 useable interviews were completed successfully (92% of the active sample). There were 157 refusals (4% of the active sample). The remainder could not be contacted. 2006 was the last year of regular telephone interviews for the 1995 Year 9 LSAY cohort.

The 2006 sample consisted primarily of young people in the eighth year following the completion of secondary school. The survey instrument collects data on their educational and labour market participation. It has a particular emphasis on pathways through further education and training, and life-long learning. The survey involves around 25 minutes of telephone interview time.
